

Mobil EAL Envirosyn H Series

Mobil Industrial , Ecuador Hydraulic Fluids

Product Description

Mobil EAL Envirosyn H Series oils are super premium, high performance fully synthetic environmentally aware hydraulic and circulating oils designed to poutstanding performance in systems operating at moderate to severe conditions. They provide excellent wide temperature range performance above and beyo capabilities of non-synthetic environmentally aware oils. Mobil EAL Envirosyn H Series provides exceptional anti-wear and film strength characteristics necess hydraulic systems operating under high load and high pressures. This is verified by their excellent wear control in the ASTM D 2882 and Vickers 35VQ25 Pump Tests. Their 12-stage rating in the FZG Gear Load Test demonstrates a high level of protection against wear and scuffing and the suitability of this product to protect and bearings used in conjunction with hydraulic systems. The Mobil EAL Envirosyn H Seriess provide excellent protection against corrosion and ensures very multi-metal compatibility allowing its use in systems employing various metallurgy that may be used in pump and component design. They also provide very good film protection against rusting. In addition to their exceptional performance capability, they satisfy the requirements for ready biodegradability and non-toxicity rethem a desirable product for severe operating conditions where leakage or spillage of conventional oils could result in damage to the environment.

Mobil EAL Envirosyn H Series oils are formulated from select, high-quality, high-VI synthetic base oil materials and high technology additive system spec engineered to meet or exceed the performance requirements of most hydraulic pump and system builders while satisfying the stringent criteria for biodegradabil toxicity. Compared to the best vegetable oil-based and synthetic ester based hydraulic oils, these products provide improved oxidation stability and ant performance, together with improved high and low temperature performance (-20° F to 200° F).

Features and Benefits

Mobil EAL Envirosyn H Series oils provide excellent wide temperature range performance. Their exceptional anti-wear, lubricity, and film strength characteristics performance in hydraulic and circulation systems operating under moderate to severe conditions. The ready biodegradability and virtually non-toxic nature of products make them an excellent choice where leakage or spillage could enter environmentally sensitive areas. The inadvertent leakage of spillage of this procentially sensitive areas could result in easier clean-up and lower remediation costs.

| Features | Advantages and Potential Benefits |
|---|---|
| Ready Biodegradability and Non-Toxicity | Reduces potential for environmental damage Lowers potential remediation and clean-up costs caused by spills or leakage Becomes an integral part of plant environmental programs |
| Excellent Wide-Temperature Range Performance | Assures high level system lubrication at high and low temperatures |
| High Oxidation Stability | Long oil life Reduced deposit and sludge formation Extended filter life |
| Outstanding Load-Carrying and Anti-Wear Properties | Protects system components against wear and scuffing Provides long equipment life |
| Exceptional Corrosion Protection | Reduces corrosion of internal system components |
| Excellent Multi-Metal Compatibility | Will not react with steel or copper alloys |
| Good Elastomer Compatibility | Works well with same elastomers used with conventional mineral based oils. No need for special sea elastomers |

Applications

• Hydraulic systems where spills or leakage could result in damage to the environment

- In systems where readily biodegradable and virtually non-toxic fluids may be required
- · Circulation systems containing gears and bearings where mild extreme-pressure characteristics are desired
- Systems containing servo-valves
- Hydraulic systems operating with oil temperatures in the range of -20F to 200F
- Marine and mobile equipment operating in environmentally sensitive areas
- Circulation systems operating under mild to moderate service conditions
- Industrial hydraulic systems where leaked or spilled fluids could get into plant effluent
- Air line oilers and some limited oil-mist generating systems
- Air-over-hydraulic fluid systems operating in environmentally sensitive areas

Specifications and Approvals

| This product is recommended for use in applications requiring: | 46 | 68 |
|--|----|----|
| Eaton I-286-S | X | X |
| Eaton M-2950-S | X | X |
