Mobil SHC™ Hydraulic EAL

Mobil Industrial , Qatar

High Performance Synthetic Hydraulic Oil

Product Description

Mobil SHC[™] Hydraulic EAL fluids are high performance biodegradable synthetic hydraulic oils for modern hydraulic systems. The fluids are designed to meet the d∉ for environmentally acceptable hydraulic lubricants. Mobil SHC Hydraulic EAL fluids are exceptionally high quality, wide-temperature, shear-stable hydraulic oi controlled low-temperature pumpability properties and maximised anti-wear protection for hydraulic systems operating under high load and high pressures.

*Energy efficiency relates solely to the fluid performance when compared to ExxonMobil's standard hydraulic fluids. The technology used provides up to 3.6 % efficiency are to Mobil DTE 25 when tested in a Eaton 25VMQ vane pump under controlled conditions in accordance with applicable industry standards and pro Efficiency improvements will vary based on operating conditions and application.

Features and Benefits

- Meets requirements for EU Ecolabel, Blue Angel, SS 155434 and USDA BioPreferred®.
- Outstanding load-carrying and anti-wear properties which protect system components against wear and scuffing and help provide long equipment life.
- Shear stable high viscosity index helps sustain component protection over a wide temperature range.
- Excellent thermal and oxidation stability that can help reduce maintenance downtime and costs by contributing to system cleanliness and deposit reduction, er long oil and filter life.
- Excellent demulsibility ensures ease of water removal in below waterline applications.
- Good elastomer compatibility; works well with same elastomers used with conventional mineral hydraulic oils.

Applications

- In systems where readily biodegradable and minimally toxic fluids may be required.
- Hydraulic applications where a reduction in energy consumption is desired.
- Circulation systems containing gears and bearings where mild extreme-pressure characteristics are desired.
- Systems containing servo-valves, where cleanliness is essential.
- Hydraulic systems operating with oil temperatures in the range of -17 °C (1.4° F) to +93 °C (199° F).
- Mobile, marine and forestry equipment operating in environmentally sensitive areas.
- Circulation systems operating under mild to moderate service conditions.
- Industrial hydraulic systems where leaked or spilled fluids could get into plant effluent.

Specifications and Approvals

This product has the following approvals:	32	46	68
Blue Angel RAL-UZ 178	х	х	х
Denison HF-1	Х	х	х
Denison HF-2	х	х	х
Denison HF-6	Х	Х	х

Mobil SHC™ Hydraulic EAL

This product has the following approvals:	32	46	68
Eaton Brochure No. 03-401-2010, Rev 1		х	x
HOCNF Norway-NEMS, Black	x	х	x
USDA Certified BioBased Product	×	х	x

Properties and Specifications

Property	32	46	68
Grade	ISO 32	ISO 46	ISO 68
Density @ 15 C, kg/l, ASTM D4052	0.936	0.930	0.923
FZG Scuffing, Fail Load Stage, A/8.3/90, ISO 14635-1	10	11	11
Flash Point, Cleveland Open Cup, °C, ASTM D92	282	298	292
Kinematic Viscosity @ 100 C, mm2/s, ASTM D445	6.2	7.7	11
Kinematic Viscosity @ 40 C, mm2/s, ASTM D445	31.1	43.3	71
Pour Point, °C, ASTM D97	-33	-42	-27
Viscosity Index, ASTM D2270	152	149	144
