Mobilgear OGL Series Page 1 of 2

# Mobilgear OGL Series

Mobil Industrial, Uruguay

Grease

### **Product Description**

Mobilgear OGL 007, 009, 2800 and 461 are high performance advanced technology lubricants which incorporate both extreme pressure additives and finely disparability for load carrying. They are intended primarily for the lubrication of large, slow to medium speed, heavily loaded gears. In addition to providing outstandin carrying, they are formulated to have excellent adhesion and resistance to "fling-off" under extreme conditions. Mobilgear OGL 007, 009, 2800 and 461 are pumped from drums to application spray nozzles with conventional transfer pumps. The soft consistency and the low temperature properties of Mobilgear OGL 00° 2800 and 461 are suited to spray applications operating under a wide variety of conditions. Mobilgear OGL 007, 009, 2800 and 461 are formulated with a capacitied quality of finely dispersed graphite which contributes significantly to wear prevention under the boundary lubrication conditions found in the high load speed operations typical of large open gearing. Furthermore Mobilgear OGL 2800 offers enhanced surface protection for open gear applications with a 12% consolid EP additives.

#### Features and Benefits

Mobilgear OGL 007, 009, 2800 and 461 are leading members of the Mobilgear brand of products that enjoy a worldwide reputation for performance and innor Developed by ExxonMobil research scientists and backed by a worldwide technical support staff, Mobilgear OGL 007, 009, 2800 and 461 have provided ex protection and performance in large open gearing in a wide variety of industrial applications. Mobilgear OGL 007, 009, 2800 and 461 were developed to me requirements of Original Equipment Manufacturers (OEMs) and the needs of customers who prefer to use a soft to semi-fluid grease for heavily loaded, slow to m speed open gearing. A critical need for products of this type is to separate the heavily loaded gear teeth and avoid surface wear and damage. Mobilgear OGL 007, 2800 and 461 are formulated with a specific quality of finely dispersed graphite which has been shown by our researchers to contribute significantly elastohydrodynamic (EHL) film thickness under the high load / slow speed conditions typical of large open gearing.

Features	Advantages and Potential Benefits		
Special formulation provides outstanding load-carrying and anti-wear properties	Superior protection against wear and reduced gear replacement costs		
Excellent pumpability and sprayability for the semi-fluid NLGI 00 grades	Efficient operation, good low temperature start-up and reduced e consumption		
Very good protection against rust and corrosion	Longer equipment life, reduced downtime and reduced maintenance costs		
Very good adhesive nature of the product	Reduced fling-off, consumption and lower lubricant costs		
Absence of lead, nitrite and solvent	Reduced impact on the environment		

#### Applications

Mobilgear OGL 007, 009, 2800 and 461 are designed for the lubrication of large, slow to medium speed, heavily loaded gears in heavy-duty applications. Mobilgear 007, 009 and 2800 are conveniently applied by spray on gear teeth. Mobilgear OGL 461 is also suitable to prime the surfaces of newly assembled open gears in or provide lubrication during initial turning. The Mobilgear OGL Series is used in a wide variety of industrial sectors including Mining industries, including those that of at high temperatures, for example, ring gears on cement kilns and ball mills Steel, cement, paper and chemical applications.

## **Properties and Specifications**

Property	Mobilgear OGL 007	Mobilgear OGL 009	Mobilgear OGL 2800	Mobilgear OGL 4
Grade	NLGI 00.5	NLGI 00.5	NLGI 00.5	NLGI 1.5
Penetration, Worked, 25 C, 0.1 mm, ASTM D217	405	405	405	305

Mobilgear OGL Series Page 2 of 2

Property	Mobilgear OGL 007	Mobilgear OGL 009	Mobilgear OGL 2800	Mobilgear OGL₄
Viscosity @ 40 C, Base Oil, mm2/s, ASTM D445	460	1500	2800	460
Color, Visual	Black	Black	Black	Black
Copper Strip Corrosion, 24 h, 100 C, Rating, ASTM D4048	1B	1B	1B	1B
Corrosion Prevention, Rating, ASTM D1743	Pass	Pass	Pass	Pass
Dropping Point, °C, ASTM D2265	180	180	180	180
FZG Scuffing, Fail Load Stage, A/2.8/50., ISO 14635-3		12+	12+	
FZG Scuffing, Fail Load Stage, A/8.3/90, ISO 14635-1	12+	12+		
Four-Ball Extreme Pressure Test, Weld Point, kgf, ASTM D2596	620	620	620	620
Four-Ball Wear Test, Scar Diameter, mm, ASTM D2266	0.5	0.5	0.3	0.6
