

Mobil Brake Fluid DOT 3

Mobil Passenger Vehicle Lube , South Korea

High Performance Hydraulic Brake Fluid

Product Description

Mobil Brake Fluid DOT 3 is a high performance hydraulic brake fluid for use in automotive disc, drum and anti-skid brake systems and clutch systems.

Features and Benefits

Mobil Brake Fluid DOT 3 is based on polyethylene glycol ether technology to provide a high level of brake and clutch performance in automotive and commercial vehicles. Key features and benefits include:

| Features | Advantages and Potential Benefits |
|--------------------------------|---|
| High boiling point | Consistent and safe brake performance under high braking pressure |
| Minimum rubber component swell | Reduces leakage and loss of fluid to a minimum |
| Excellent corrosion protection | Improved life and reliability of brake system components |

Applications

Mobil Brake Fluid DOT 3 is recommended by ExxonMobil for use in applications where disc, drum and anti-skid braking systems are used in vehicles requiring DOT 3 level performance.. ExxonMobil recommendations for use include:

- Use only in its concentrated form out of a previously unopened or well sealed container
 - Always seal the container immediately after use as the fluid absorbs moisture from the atmosphere quite rapidly; this will reduce service life significantly.
- Never reuse drained brake fluid.
- Brake fluid can affect the vehicle paintwork, so remove spills immediately without rubbing.
- Brake fluid should be drained from the vehicle every two years or 40,000 Km (24,000 Miles) and refilled.
- Check Owners Operators Manual for details.

Specifications and Approvals

| This product meets or exceeds the requirements of: |
|--|
| FMVSS 116 DOT 3 |
| ISO 4925:2005 Class 3 |
| SAE J1703 |

Health and safety
