## MOBILCUT™ 80

Mobil Industrial, India

#### **Product Description**

Mobilcut is the trademark for Mobil Industrial lubricants line of high performance water miscible metal removal fluids. Formulated with leading edge base oils, add and emulsifiers, the Mobilcut series provides dependable performance in a wide array of metal removal processes. The products are designed to work in a var water qualities and offer low foam potential and long-term corrosion protection for machine and components. Low maintenance and inherently stable, Moproducts are designed for the modern machine shop where long service life, excellent machining performance and health and environmental concerns are impressed productivity. These products are supplied in concentrated form and require mixing with water at the point of use.

Mobilcut 80 is a general purpose semisynthetic metalworking fluid, which when mixed with water forms a very stable micro emulsion. This product has a low oil c and as a result the emulsion is clear to translucent and is very stable in harder water upto 1000ppm, ensuring consistent quality parts production.

### Features and Benefits

| Features   | Advantages and Potential Benefits                  |
|--|--|
| Forms stable emulsions and solutions                                     | Ease of use and maintenance                        |
| Low foaming potential  | Improved performance even in high pressure systems |
| Resists formation of sticky residues                                     | Improves machine cleanliness                       |
| Neutral Odor   | Enhances the workplace environment                 |
| Compatible with high performance Mobil Vactra Oil No slideway lubricants | Easy separation and removal of tramp oil           |
| Chlorine Free formulation  | Ease of disposal and safer to use                  |

# **Applications**

This product is generally recommended for cutting most ferrous and some non-ferrous alloys in light to medium duty applications such as turning, milling, drilling grinding.

Fluid Type: Semi-synthetic

Diluted Appearance: Translucent

Mineral Oil Content (in concentrate): 9% Refractometer Correction factor: 2.4

## **Properties and Specifications**

| Property                          |                    |
|-----------------------------------|--------------------|
| Appearance, Rating, PTM 100       | Clear Amber Liquid |
| Specific Gravity at 15 C, PTM 103 | 1.02               |
| Rust Protection, % v/v, PTM 108   | 3                  |
| pH at 5% DI Water, PTM 104        | 9.5                |
